PROFILE

I'm Alireza Hosseini, a front-end developer with 1.5 years of experience working with React, JavaScript, and Next.js. I enjoy building beautiful and functional user interfaces and am always looking to improve my skills. I learn quickly, work well with others, and am eager to grow in a creative and friendly environment while taking on new challenges.

SKILLS

- React
- Next
- Javascript
- Typescript
- Nextui
- Tailwind
- Git
- RESTful API

PROJECTS

NEXT - MOVIES

This project was developed using Next.js, Tailwind CSS, and the TMDB API. In this project, the App Router in Next.js is used, and data is dynamically fetched from the server. Users can search and filter movies and TV shows.

Next | Tailwind | React

<https://next-movie-dun.vercel.app>

Weather app

Built with JavaScript, this app uses two APIs to get the user's location and time, along with a weather API. Users can select two cities and see the local time and 12 hour weather forecast for each.

Javascript | Sass | Dark mode | IP Geolocation api

Todo app

This is a task management app built with JavaScript. Users can prioritize, filter, and sort tasks, as well as create categories. It uses localStorage to save data, and Bootstrap along with Sass for styling

Javascript | localStorage | Sass
